All pricing in accordance with U.S. Communities Contract #110179.

All terms in the U.S. Communities Contract take precedence over terms shown below.

Permits are not included in cost, unless specifically listed in pricing. If permits are required Signed/Sealed drawings are usually needed and are also not included unless specifically listed in pricing. Any costs for municipal permits, paid by installer, will be charged back to the owner. Adding permits to any job will increase the length of completion, expect total time to be 90-120 days, after receipt of order (this is not due to manufacturing but rather the permit process at the municipality level). It is expected that the **owner will provide approved site plans** of the area for the permit office, and will help and assist in the securing of all required approvals before assembly of equipment can begin. Installer cannot provide site plans. The permit process does not begin until the site plans are available. If additional not included permitting requirements are needed during the process, those will be added and billed accordingly, i.e. soil density test, formed footers, etc.

All pricing in accordance with U.S. Communities Contract #110179.

All terms in the U.S. Communities Contract take precedence over terms shown below.

Permits are not included in cost, unless specifically listed in pricing. If permits are required Signed/Sealed drawings are usually needed and are also not included unless specifically listed in pricing. Any costs for municipal permits, paid by installer, will be charged back to the owner. Adding permits to any job will increase the length of completion, expect total time to be 90-120 days, after receipt of order (this is not due to manufacturing but rather the permit process at the municipality level). It is expected that the **owner will provide approved site plans** of the area for the permit office, and will help and assist in the securing of all required approvals before assembly of equipment can begin. Installer cannot provide site plans. The permit process does not begin until the site plans are available. If additional not included permitting requirements are needed during the process, those will be added and billed accordingly, i.e. soil density test, formed footers, etc.

All pricing in accordance with U.S. Communities Contract #110179.

All terms in the U.S. Communities Contract take precedence over terms shown below.

Permits are not included in cost, unless specifically listed in pricing. If permits are required Signed/Sealed drawings are usually needed and are also not included unless specifically listed in pricing. Any costs for municipal permits, paid by installer, will be charged back to the owner. Adding permits to any job will increase the length of completion, expect total time to be 90-120 days, after receipt of order (this is not due to manufacturing but rather the permit process at the municipality level). It is expected that the **owner will provide approved site plans** of the area for the permit office, and will help and assist in the securing of all required approvals before assembly of equipment can begin. Installer cannot provide site plans. The permit process does not begin until the site plans are available. If additional not included permitting requirements are needed during the process, those will be added and billed accordingly, i.e. soil density test, formed footers, etc.
