Ed

I have to say last night was just another reason why you never should have become the mayor of such a great town as Cutler Bay. Your comment on how I was the one that could never be satisfied was probable the most truthful line out of everything you said last night and not that I had any great expectations after seeing your previous performances first hand.

You are absolutely right I will never satisfied by or willing to accept my tax dollars being wasted on projects that are intended to improve our community when in all honesty they are bringing the level of our community to a sub standard level. Our sidewalk repairs were done horrible but apparently your not interested in doing things right as much as you are at feeding your political ego. I should have seen that red flag when I told you I don't appreciate you wasting our tax dollars on sub standard workmanship and you reply was its not your tax dollars its money from Miami Dade County. I guess you must of though I was dumber then you but I am not that person you thought I was. Unfortunately some of us are able to think and act in the best interest of the community and its tax paying citizens and it doesn't even cost you anything cause its not even your money.

In addition to sidewalks, our newly paved roads have had and continue to have grass growing out of them from the very beginning, and a couple places have even had to be repaired a couple times due to the sub standard level of work we were presented with. The patches on our Sidewalks that I originally tried explaining to you would chip away over time have already started even though you told me that it was all perfectly fine and that there was nothing wrong with the workmanship or lack there of. I have a sidewalk flag that when it was first noted had a hole in it was patched with blacktop and was later told it would be replaced at a later date as a re-de. When somethings not being done right and the public works department is telling me that the town is waiting to remove the contractor from our town due to their lack of professionalism and your telling me everything is fine I have to say I am gonna listen to the public works department workers as its clearly obvious that one thing comes out of one side of your mouth while something completely different comes out the other side.

So as for the fact that Cutler Bay and its elected officials have never made it into the herald is just a case of extended luck but I have a feeling you'll bee in the herald sooner then later.

Do It Once, Do It Right.

Truthfully, at this point, I do not care what you think. You have never done one thing for this Town except complain. I visited your home with our Town manager on Father's Day and you offered nothing but complaints and it was your kids who trashed the area.

I built this Town with out so much as a hint of help from you. You are a crybaby that will never amount to squat. I am at last retiring from politics and it is because of thankless jerks like you.

Go fix your own problems. Quit crying to others and grow a pair. Oh, and by the way, don't bother replying, I have sent anything from you to TRASH where it belongs.
